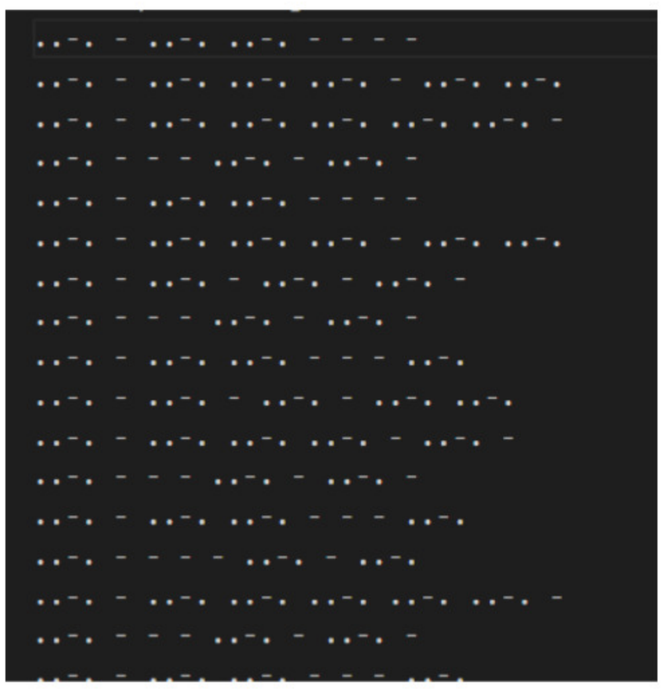
# Cipher Cracking

Cipher Cracking

> I've been sitting here for days, listening to the radio and writing down dots and dashes. I'm starting to feel like one of those old-timey codebreakers, you know? To be honest, I have no idea what it all means! Think you can help me out?

## About the Challenge

We were given a file (You can download the file here). If we check the file, the file contain some morse code



## How to Solve?

For this chall, I only using CyberChef there are some operation that can you use in CyberChef:

- From morse code to ASCII
- Change the character (F == 0 and T == 1)
- From binary
- From base64
- Remove the dot using `split`
- From decimal to ASCII
- From base32
- Reverse the text
- The last one is caesar cipher (Shifted 19 characters)

You can also access the link below to see the decryption process
