Insanity Check

Hello and welcome to cursed ctf for real. glad you read the rules lets go.

Hello and welcome to cursed ctf for real. glad you read the rules lets go.

About the Challenge

We were given a server to connect and we need to find the `sanity check` flag from each CTF competition

```
Insanity is the act of doing the same thing over and over again and expecting different results.

We just need to make sure you know how to submit flags. Please answer the following questions

Plaid CTF 2015: |
```

How to Solve?

To solve this chall, you need to find the information about some CTF competition. For example `Plaid CTF 2014:` , I can get information about the flag using `ctftime` or you can search it in Github or you can find the flag by reading someone's writeup

```
Insanity is the act of doing the same thing over and over again and expecting different results.

We just need to make sure you know how to submit flags. Please answer the following questions
