

how to hack a wordpress website :::

1st go to website and view the source code and find some keyword example:

wordpress > for know the wordpress version
style.min.css > for know the css version
wp-includes > for search any clue
wp-content > for search any clue
wp-content/plugins/ > for search all pulgin

2nd try to Find some Path:

.htaccess
robots.txt
wp-config.php
wp-content/plugins
wp-content/themes
wp-content/uploads
wp-includes/
wp-includes/css
wp-includes/js/
wp-includes/js/jquery
wp-json/
wp-json/wp
wp-json/wp/v2/
wp-json/wp/v2/users
wp-login.php

3rd try to scan by wpscan or other tools and find theme and plugin details

wappalyzer Plugin or Online
