🔗 cyber cat

i've hidden a flag in this picture of my cat

About the Challenge

We were given an image (You can download the file [here](#)) and we need to find the flag inside that image

How to Solve?

To solve this chall, im using `strings` and `grep` . Here is the command I used

```
strings cyber_cat.png | grep "cursed{"
```

This command is using the strings command to extract human-readable strings from the file `cyber_cat.png` . Then, it uses the grep command to search for the string `cursed{` in the output of the strings command.

```
(kali@kali)-[~/Desktop]
$ strings cyber_cat.png | grep "cursed{"
cursed{lmao}
```

```
cursed{lmao}
```
