README.md

The challenge is the following,

946

With the information we got from the previous problem we can surely get on their system!

For this challenge you can run nmap, but only against `misc2.utctf.live` on port 8222.

By Robert Hill (@Rob H on discord)

`misc2.utctf.live:8222`

are told that we should use what we found in [BluePan1c P1](#) for [BluePan1c P1](#), we found a picture of the flag on the whiteboard

Some crazy things happened over the last year. Really happy to find a new home at Sagishi Tech with an
